

Microsoft® Lync™ Server 2010 Migration, Management and Voice Premier Custom Workshop

Welcome & Overview

Agenda

- Microsoft's Unified Communications (UC) solutions use the power of software to streamline communication. Microsoft Lync, one of the cornerstones of Microsoft's UC solution, is the platform for presence, instant messaging, conferencing, and enterprise voice for businesses around the world.
- Microsoft Lync Server 2010 now delivers complete presence, instant messaging, conferencing and enterprise voice capabilities through a single, easy-to-use interface that is consistent across PC, browser, and mobile device. Administrators benefit from a single, consistent management infrastructure, new capabilities to increase availability, and interoperability with existing systems.
- Learn more about the new features and functionality in the Microsoft Lync update that continue to deliver on the Microsoft promise to streamline communications for users, give IT organizations the flexibility and control they need, and provide an extensible communications platform.
